

Ohio State Energy Sector Partnership Charter

Purpose: To serve as the steering committee for the creation, implementation, and monitoring of Ohio's statewide energy sector plan for workforce development.

Vision: To develop a pipeline of qualified, skilled workers that meets employer demand and promotes a robust green energy supply chain.

Mission: To oversee the training of workers for employment in the targeted industry sectors of solar, wind, and biomass.

Goals: To support our vision and mission through the following:

- Engage business to identify current and emerging in-demand skill sets to build upon Ohio's existing green energy curricula.
- Establish an employer-driven training process that cultivates a pipeline of skilled energy workers.
- Align Ohio's workforce energy policies to leverage and maximize outcomes.

Key Functions: To achieve our goals through the following:

- Meet quarterly, or as often as needed, and establish subcommittees including:
 - Executive
 - Metrics and Outcomes
 - Ad Hoc Committees
- Monitor the implementation of Ohio's energy sector plan for workforce development and initiate corrective action if necessary.
- Secure alternative funding, resources, and partnerships that support our purpose, vision, mission, and goals.
