

GREEN JOBS GRANTS – \$190 MILLION AVAILABLE FOR STATE ENERGY SECTOR PARTNERSHIPS AND TRAINING

The American Recovery and Reinvestment Act of 2009 (The Recovery Act) was signed into law by President Barack Obama on February 17, 2009. The Recovery Act designates \$500 million for projects that prepare workers for careers in the energy efficiency and renewable energy sectors described in Section 171(e)(1)(B) of the Workforce Investment Act (WIA). The purpose of these grants, which fund both green job training and research projects, is to teach workers the skills required in these emerging energy efficiency and renewable energy sectors. These efforts will lead program participants to job placement while leveraging other Recovery Act investments intended to create jobs and promote economic growth. On Wednesday, June 24, 2009 the Department of Labor's Employment and Training Administration (DOL ETA) published a Notice of Availability of Funds and Solicitation for Grant Applications for **State Energy Sector Partnerships and Training**.

Background and Strategic Vision

The DOL ETA will promote economic recovery by supporting the training needs of workers and employers in high growth and emerging industries and assist individuals impacted by the recession by providing training and placement into employment, including the transition of auto and auto-related workers to jobs in the green energy sector.

Grants offer an opportunity to demonstrate how partnerships between the public workforce system and other public and private systems, including labor-management partnerships, education institutions, community and faith-based organizations and research institutions can meet the workforce needs of the energy efficiency and renewable energy sectors.

Successful organizations and partnerships will ensure that supportive services are integrated with education and training programs so that individuals can have access to a comprehensive array of supportive options. These organizations and partnerships will assist individuals in entering career pathways leading to economic self-sufficiency.

Efforts will lead program participants to job placement while leveraging other Recovery Act investments intended to create jobs and promote economic growth.

State Energy Sector Partnerships and Training Grants

Purpose: A sector strategy is a workforce development approach that targets the needs of a specific industry sector. Sector strategies are designed and implemented by a range of institutions and groups working collaboratively, including community and faith-based organizations, business and industry groups, educational institutions such as community and technical colleges, the public workforce system, labor- management partnerships, and others. Grant funds awarded under this SGA will be used to provide training, job placement, and related activities that reflect a comprehensive statewide energy sector strategy.

Funding Available: The State Energy Sector Partnerships and Training Grants contains approximately \$190 million in grant funds authorized by the Recovery Act. Approximately \$25 million of the total funds available through this SGA will be reserved for projects in communities impacted by automotive-related restructuring.

Eligible Applicants: The eligible applicants for this SGA are State Workforce Investment Boards in partnership with their State Workforce Agency, local Workforce Investment Boards or regional consortia of Boards, and One Stop Career Center delivery systems. The State Energy Sector Partnership must include at least one representative from the following: State Cabinet officials from agencies receiving Recovery Act funding related to relevant energy efficiency and renewable energy resources; representatives from energy efficiency and renewable energy business and industries; and labor organizations. State Energy Sector Partnerships are encouraged to include members from the following: State Apprenticeship Agencies or the UDSOL Office of Apprenticeship; nonprofit organizations including community and faith-based organizations; the education and training community; State and Local veterans' agencies; and, economic development organizations. Only one application may be submitted per State. For the purposes of this SGA, the term "State" means each of the 50 States of the United States, the District of Columbia, and the U.S. territories.

Grant Amounts: ETA intends to fund grants ranging from approximately \$2 to \$6 million.

Deadline: The closing date for receipt of applications under this announcement is October 20, 2009. Applications must be received no later than 4 p.m. (Eastern Time).

Green Industries and Occupations: Grantees will implement research and training programs that will help prepare individuals for careers in any of the seven energy efficiency and renewable energy industries defined in Section 171(e)(1)(B)(ii) of the WIA, which include: the energy-efficient building, construction, and retrofit industries; the renewable electric power industry; the energy efficient and advanced drive train vehicle industry; the biofuels industry; the deconstruction and materials use industries; the energy efficiency assessment industry serving residential, commercial, or industrial sectors; and manufacturers that produce sustainable products using environmentally sustainable processes and materials.
